SET-- 4

III B. Tech I Semester Regular Examinations, July -2023

MACHINE LEARNING

(Com. to CSE & IT)

Time: 3hours

Max.Marks:70

Answer any FIVE Questions ONE Question from Each unit
All Questions Carry Equal Marks

UNIT-I

1. a) Compare and contrast Instance-Based and Model-Based Learning [7M]
b). Explain the process of Machine Learning step by step. [7M]
(OR)
2. a) What is Empirical Risk Minimization? Explain Regularized and Structural risk minimizations? [7M]
b) Write about Sampling distribution of an estimator. [7M]

UNIT-II

3. a) Write and explain linear regression with an example. [7M]
b) What is the Sigma id function? Where it can be used? Explain. [7M]
(OR)
4. a) What is Over fitting? Explain about SVM algorithm to overcome it? [7M]
b) Discuss about Linear regression with an example. [7M]

UNIT-III

5. a) Illustrate the stacking mechanism in ensemble techniques. [7M]
b) What is bagging technique? Explain about Random Forest Algorithm. [7M]
(OR)
6. a) What is Linear classifier? Explain SVM linear classification. [7M]
b) What is Kernel trick? Describe polynomial kernel function. [7M]

UNIT-IV

7. a) What are the main applications of clustering algorithms? Illustrate. [7M]
b) How can we use clustering for semi-supervised learning? Explain [7M]
(OR)
8. a) Explain the concept of PCA for Compression. [7M]
b) How can you evaluate the performance of a dimensionality reduction algorithm on your dataset? Explain. [7M]

UNIT-V

9. a) Explain about Multi Layer Perceptron (MLP) ANN architecture. [7M]
b) How is data loaded with Tensor Flow? Illustrate the steps. [7M]
(OR)
10. a) What types of neural network layers does Keras support? Explain them. [7M]
b) Discuss about shuffle() method in Keras. [7M]

Internal Assessment (Mid Examination) Question Paper Template

UNIVERSAL COLLEGE OF ENGINEERING & TECHNOLOGY

III B.Tech I Sem (R20) MID - 1 EXAMINATION

Subject Design and Analysis of Algorithms

Time: 03:00 pm to 04:30 pm

Date: **13-08-2024**

Section: CSE

Answer the following questions

Max. Marks: 30

1.a)

b)

2.a)

b)

3.a)

b)

III B.Tech I Sem (R20) MID – 2 EXAMINATION

Subject Design and Analysis of Algorithms

Time: 03:00 pm to 04:30 pm

Date: **20-10-2024**

Section: CSE

Answer the following questions

Max. Marks: 30

1.a)

b)

2.a)

b)

3.a)

SET -1

III B. Tech I Semester Regular Examinations, July -2023 DESIGN AND ANALYSIS OF ALGORITHMS

(Common to CSE(AIML),CSE(AI),CSE(DS)CSE(AIDS), AIDS,AIML)

Time: 3 hours

Max. Marks: 70

Answer any **FIVE** Questions **ONE** Question from **Each unit**

All Questions Carry Equal Marks

UNIT-I

- Write an algorithm for linear search and analyze the algorithm for its time complexity [7M]
 - Write a short notes on probabilistic analysis. Discuss its role in Algorithmic analysis. [7M]
(OR)
- Write the properties of algorithm and various fields of study in algorithms. [7M]
 - Differentiate performance measurement and performance estimation of algorithms [7M]

UNIT-II

- Design an algorithm to sort the given list of elements using Quick Sort incorporating divide and conquer technique. Sort the following list using the same and compute its average case time efficiency: 8, 3, 0, 9, 6, 1, 3, 4. [7M]
 - Consider the following instance of Knapsack problem $N=3$, $M=20$, $(p_1, p_2, p_3)=(25, 24, 15)$, $(w_1, w_2, w_3)=(18, 15, 10)$ Calculate Maximum profit, Minimum weight and Maximum profit per unit weight. [7M]
(OR)
- Explain the merge sort algorithm 310, 285, 179, 652, 351, 423, 861, 254, 450, 520. Derive the time complexity from $T(n)=2T(n/2) + cn$ [7M]
 - Explain single source shortest path Problem with example. [7M]

UNIT-III

Website: www.ucet.edu.in
E-Mail: ucetguntur@gmail.com

Dokiparru(Vill), Medikondur(Mdl)
Guntur (Dt), Andhra Pradesh, INDIA
Phone: 0863-2291231, 2291111

5. a) Use the function OBST to compute $w(i,j)$, $r(i,j)$, and $c(i,j)$, $0 \leq i < j \leq 4$, for the identifier set $(a_1, a_2, a_3, a_4) = (\text{do}, \text{if}, \text{int}, \text{while})$ with $p(1 : 4) = (3, 3, 1, 1)$ and $q(0:4)=(2,3,1,1,1)$. Using the $r(i,j)$'s construct the optimal binary search tree
- b) Write and explain an algorithm to compute the all pairs shortest path using dynamic programming and prove that it is optimal.
- (OR)
6. a) Solve the following 0/1 Knapsack problem using dynamic programming $P=(11, 21, 31, 33)$, $W= (2, 11, 22, 15)$, $C=40$, $n=4$. [7M]
- b) Discuss the time and space complexity of Dynamic Programming traveling sales person algorithm. [7M]

UNIT-IV

7. a) Write an algorithm for sum of subsets problem. [7M]
- b) Find a solution to the 8-Queens problem using backtracking strategy. Draw the solution space using necessary bounding function [7M]
- (OR)
8. a) Describe the algorithm for Hamiltonian cycles and Determine the order of magnitude of the worst-case computing time for the backtracking procedure that finds all Hamiltonian cycles. [7M]
- b) Write the algorithm for general iterative backtracking method and explain various factors that define the efficiency of backtracking [7M]

UNIT-V

9. a) State and prove Cook's theorem [7M]
- b) Explain the P, NP, NP-Hard and NP- complete classes with suitable examples [7M]
- (OR)
10. a) Write about non deterministic algorithms and choice, failure and success functions with search example [7M]
- b) Using an example prove that, satisfiability of boolean formula in 3-Conjunctive Normal form is NP-Complete. [7M]

III B.Tech I Semester Regular/Supplymentory examinations July 2024

Q.No	Question	marks	CO'S	TL
1.a	Write an algorithm for linear search and analyze the algorithm for its timecomplexity	7	cO42033.2	Understand
1.b	Write a short notes on probabilistic analysis. Discuss its role in Algorithmicanalysis	7	CO42033.4	Analyze

III B. Tech I Semester Regular Examinations, Dec/Jan – 2022-23
REMOTE SENSING AND GIS

(Common to CE, MIN)

Time: 3 hours

Max. Marks: 70

Answer any FIVE Questions ONE Question from Each unit
All Questions Carry Equal Marks

UNIT-I

1. a) Discuss the energy interaction with the surface of earth? [7M]
b) What are the different types of scattering? Explain in detail about Rayleigh scattering? [7M]

(OR)

2. a) What are the current IRS satellite series? Discuss their applications. [7M]
b) What is electromagnetic radiation? Give a neat sketch of its spectrum and wavelength ranges. [7M]

UNIT-II

3. a) Prepare the flow chart for digital image processing sequence by means. [7M]
b) What is supervised classification? What are the basic steps and stages involved in a typical supervised classification? [7M]

(OR)

4. a) What is supervised classification? What are the basic steps and stages involved in a typical supervised classification? [7M]
b) Describe the importance of image classification in Remote Sensing. [7M]

UNIT-III

5. a) Explain in detail about map projections. [7M]
b) Define GIS. Briefly explain about spatial and aspatial data types with appropriate examples. [7M]

(OR)

6. a) Write about vector data models. [7M]
b) Differentiate between data analysis and data display. [7M]

UNIT IV

7. a) What do you understand about network analysis, explain in detail. [7M]
b) Explain in detail about vector overlay operations. [7M]

(OR)

8. a) What does raster overlay? Explain it with suitable examples. [7M]
b) What do you understand about network allocation and network tracing explain it in detail. [7M]

Code No: R203101B

R20

SET - 1

UNIT-V

9. a) Discuss the use of RS and GIS techniques in forestry applications. [7M]
b) Discuss how GIS and RS can be applied for identifying the sites for artificial recharging of water table. [7M]
- (OR)
10. a) How remote sensing and GIS is useful in Land resources management? [7M]
b) Explain with a suitable example how RS and GIS is helpful in land resource management. [

IIIB.TechII Sem (R20) MID - 1 EXAMINATION

Subject:GTE-II Time : 10:00 am to 11:30 am

Date : Section : CIVIL

Answer the following questions

Max. Marks : 30

1. a) Enumerate the various methods of subsoil exploration. Describe the procedure to conduct the standard Penetration Test and corrections to be applied
b) Explain pressure meter test.
2. a) Explain different types of shear failures of soil with neat sketch.
b) Compute the safe bearing capacity of a continuous footing 1.5 m wide, at a depth of 1.5 m, in a soil with $\gamma = 18 \text{ kN/m}^3$, $c = 18 \text{ kN/m}^2$, and $\phi = 25^\circ$. Terzaghi's factors of $\phi = 25^\circ$ are $N_c = 25$, $N_q = 12.5$, and $N_\gamma = 10$. What is the safe load per meter run if the factor of safety is 3?
3. a) Describe the procedure to conduct the plate load test with a sketch and state its limitations.
b) A 1.8 m square column is founded at a depth of 1.8 m in sand, for which the corrected N-value is 24. The water table is at a depth of 2.7 m. Determine the net allowable bearing pressure for a permissible settlement of 40 mm and a factor of Safety of 3 against shear failure.

Sample Internal Question Paper Analysis:

Regulation: R20

Year: III-II

IIIB.TechII Sem (R20) MID –2 EXAMINATION Subject:GTE-II

Time: 03:00 pm to 04:30 pm

Date : Section : CIVIL

Answer the following questions

Max. Marks : 30

1. a) Explain Skempton's bearing capacity theory?
- b) A rectangular footing of size 2m x 3m has to transmit the load of a column at a depth of 1.50m. Calculate the safe load which the footing can carry for a factor of safety of 3 against shear failure. Use IS code method. The soil has the following properties : $n = 40\%$; $G = 2.67$; $w = 15\%$, $c=10\text{KN/m}^2$; $\Phi = 32^\circ$. $N_c=38$, $N_q=26$, $N_\gamma=35$
2. a) Explain any one formula to determine the safe bearing pressure based on N- value?
b) summarize the harmful effects of differential settlement on structures? What are the possible remedial measures?
3. a) Summarise tilts and shifts of wells?
b) A 9-pile group, 10m long is used as the foundation for a column. The piles are 40cm diameter with centre to centre spacing at 1000mm. The subsoil consists of clay with unconfined compressive strength of 250KPa. Estimate the safe load. Assume factor of safety = 4.00.

IIIB.Tech IISemester Regular Examinations, July- 2023 GEOTECHNICAL ENGINEERING-II

(Civil Engineering)

Time: 3 hours

Max. Marks: 70

Answer any FIVE Questions ONE Question from Each unit

All Questions Carry Equal Marks

UNIT-I

- Explain in detail about the methods of soil exploration. [7M]
 - The cone penetration resistance obtained in a clay soil in a CPT was 50 kg/cm^2 . Determine the undrained strength of the clay. The total overburden pressure at the depth was 100 kN/m^2 . [7M]

(OR)

- Define Boring. Explain in detail the different methods of boring. [14M]

UNIT-II

- Discuss the probable types of failure of a slope. [7M]
 - Determine the factor of safety with respect to cohesion only for a submerged embankment 25m high whose upstream face has an inclination of 45° . The soil has the following properties: $C=40 \text{ kN/m}^2$, $\phi=10^\circ$, $\gamma=18 \text{ kN/m}^3$. The relevant stability number is equal to 0.108. [7M]

(OR)

- What are the assumptions in Coulomb's theory? [7M]
 - Explain in detail the Cullman's graphical method. [7M]

UNIT-III

- Explain the IS code method to determine the bearing capacity? [7M]
 - A footing 2m square is laid at a depth of 1.3m below the ground surface. Determine the net ultimate bearing capacity using IS code method. Take $\gamma=20 \text{ kN/m}^3$, $\phi=30^\circ$ and $C=0$. [7M]

(OR)

- Explain types of foundations and factors to be considered in their location. [7M]
 - Discuss the assumptions made in the derivation of Terzaghi's bearing capacity theory? Write the equation for the ultimate bearing capacity.

UNIT-IV

- Discuss various methods of determination of the allowable bearing pressure. What are their limitations? [7M]
 - A purely cohesive soil has a unit weight of 20 kN/m^3 and cohesion of 150 kN/m^2 . Determine the safe bearing capacity for a rectangular footing $8 \text{ m} \times 2 \text{ m}$ founded at a depth of 4m in clay, F.S=3.0 [7M]

(OR)

- What are the types of foundation settlements? How is these determining? Discuss it. [7M]
 - Estimate the immediate settlement of a concrete footing $1 \text{ m} \times 2 \text{ m}$ size founded at a depth of 1m in a soil with $E=10^4 \text{ kN/m}^2$, $\mu=0.3$. The footing is subjected to a pressure of 200 kN/m^2 . Assume footing is to be rigid.

UNIT-V

1. a) Explain in details sinking of wells. [7M]
b) Explain with neat sketch different components of wells and their functions. [7M]
(OR)
- 2.a) Explain the various dynamic formulae of piles. What are their limitations?
b) Discuss the uses of pile load tests for the estimation of load-carrying capacity of piles

URBAN TRANSPORTATION PLANNING
(Civil Engineering)

Time: 3 hours

Max. Marks: 70

Answer any FIVE Questions ONE Question from Each unit
All Questions Carry Equal Marks

UNIT-I

- 1 a) Define system approach. Explain with flow diagram system approach to transport planning. [7]
- b) Explain how the land use and travel demand are related in the urban transportation planning. [7]

(OR)

- 2 a) In detail discuss the short-term and long-term planning process of urban transportation. [7]
- b) Illustrate Sequential and Simultaneous Approaches with suitable examples. [7]

UNIT-II

- 3 a) Write short notes on home interview surveys and road side interview surveys [7]
- b) Describe the detailed procedure of collection of data related to the transportation from the field (7)

(OR)

- 4 a) Explain in detail the commercial vehicle surveys [7]
- b) Explain the importance of organization of surveys and their analysis in effective urban transport planning [7]

UNIT-III

- 5 Define the term trip distribution along with various factors influencing the same. In detail explain the average factor method along with its merits and demerits. [14]

(OR)

- 6 a) Explain the term strip generation and trip distribution along with suitable examples. [7]
- b) List out the types of zonal models. Explain any three of them with suitable examples. [7]

UNIT-IV

- 7 a) Explain about All (or) Nothing Assignment and Equilibrium assignment. [7]
- b) Explain with suitable examples, the various factors affecting on the models split [7]

(OR)

- 8 a) Explain in detail the mode choice analysis and its behaviour. [7]

- b) Illustrate various probabilistic models used in the traffic analysis. [7]

UNIT-V

- 9 a) Explain the pivot point analysis with suitable examples. [7]
b) Exemplify the master plans used for corridor identification. [7]

(OR)

- 10 a) Illustrate with an example the environmental and energy analysis [7]
b) Explain the process of plan preparation and its evaluation. [7]

Q.No	Question	Marks	CO	TL
1a.	Define system approach. Explain with flow diagrams system approach to transport planning	7	CO4101D. 1	Remember
1b.	Explain how the land use and travel demand are related in the urban transportation planning	7	CO4101D. 1	Understand
2a.	In detail discuss the short-term and long-term planning process of urban transportation	7	CO4101D. 1	Remember
2b.	Illustrate Sequential and Simultaneous Approaches with suitable examples	7	CO4101D. 1	Understand
3a.	Write short notes on home interview surveys and roadside interview surveys	7	CO4101D. 2	Remember
3b.	Describe the detailed procedure of collection of data related to the transportation from the field	7	CO4101D. 2	Understand
4a.	Explain in detail the commercial vehicles surveys	7	CO4101D. 2	Understand
4b.	Explain the importance of organization of surveys and their analysis in effective urban transport planning	7	CO4101D. 2	Understand
5	Define the term trip distribution along with various factors influencing the same. In detail explain the average factor method along with its merits and demerits	14	CO4101D. 3	Remember
6a.	Explain the term strip generation and trip distribution along with suitable examples	7	CO4101D. 3	Understand
6b.	List out the types of zonal models. Explain any three of them with suitable examples	7	CO4101D. 3	Remember
7a.	Explain about All (or) Nothing Assignment and Equilibrium assignment	7	CO4101D. 4	Understand
7b.	Explain with suitable examples, the various factors affecting the models split	7	CO4101D. 4	Understand

8a.	Explain in detail the mode choice analysis and its behavior	7	CO4101D.4	Understand
8b.	Illustrate various probabilistic models used in the traffic analysis.	7	CO4101D.4	Understand
9a.	Explain the pivot point analysis with suitable examples	7	CO4101D.5	Understand
9b.	Exemplify the master plans used for corridor identification	7	CO4101D.5	Understand
10 a.	Illustrate with an example the environmental and energy analysis	7	CO4101D.5	Understand
10 b.	Explain the process of plan preparation and its evaluation.	7	CO4101D.5	Understand

Subject: RVSP

Time : 2:50 pm to 04:20 pm

Date : 7.10.2023

Section : ECE

Answer the following questions

Max. Marks : 30

- 1.a) State and prove the properties of cumulative distribution function (CDF) of X .
- b) If the probability density function of a random variable X is given by $f_X(x) = \frac{x^2}{3}$; $-1 \leq X \leq 2$ and 0; elsewhere then Find $P(0 < X < 1)$ and $F_X(x)$?
- 2.a) State and prove the Chebychev's inequality theorem.
- b) Show that any characteristic function $\phi_X(W)$ satisfies $\phi_X(W) \leq \phi_X(0) = 1$.
- 3.a) Explain about Transformation of random variable.
- b) Write the properties of Joint Distribution function.

Answer the following questions

Max. Marks : 30

1. a) Two statistically independent random variables X and Y have respective densities $f_X(x) = 5e^{-5x} u(x)$, $f_Y(y) = 2e^{-2y} u(y)$. Find the density of the sum $W = X+Y$.
b) Gaussian random variables X and Y have first and second order moments $m_{10} = -1.1$, $m_{20} = 1.16$, $m_{01} = 1.5$, $m_{02} = 2.89$, $R_{XY} = -1.724$. Find C_{XY} , ρ .
2. a) The auto correlation function for a stationary ergodic process with no periodic components is $R_{XX}(\tau) = 625 + (16/1 + 36\tau^2)$. Find mean and variance of the random process.
b) Explain about Poisson random processes.
3. a) A Random signal X(t) of PSD of $N_0/2$ is applied on an LTI system having impulse response h(t). If y(t) is output, find (i) $E[Y^2]$ (ii) $R_{XY}(\tau)$ (iii) $R_{YY}(\tau)$.
b) Derive the relationship between Auto-power spectral density and Auto correlation function.

RANDOM VARIABLES AND STOCHASTIC PROCESS

(Electronics and Communication Engineering)

Time: 3 hours

Max. Marks: 70

Answer any **FIVE** Questions **ONE** Question from **Each** unit

All Questions Carry Equal Marks

UNIT-I

1. a) State and prove the properties of cumulative distribution function (CDF) of X. [7M]
b) The random variable X has the discrete variable in the set $\{-1, -0.5, 0.7, 1.5, 3\}$ the corresponding probabilities are assumed to be $\{0.1, 0.2, 0.1, 0.4, 0.2\}$. Plot its distribution function and state is it a discrete or continuous distribution function. [7M]

OR

2. a) (i) Define probability density function of a random variable. [7M]
(ii) Show that the area under probability density function is unity
b) Suppose there is an error probability of 0.05 per word in typing using an electronic type-writer machine. What is the probability that there will be more than one error in a page of 120 words? [7M]

UNIT-II

3. a) Consider the random variable X with probability density function [7M]
$$f_X(x) = \begin{cases} \left(\frac{1}{6}\right)x, & 2 \leq x \leq 4 \\ 0, & \text{otherwise} \end{cases}$$

Find (i) $E[X]$, (ii) $E[X^2]$ and (iii) σ
b) If $h_1(X)$ and $h_2(X)$ are two functions of a random variable X. Show that [7M]
 $E[c_1h_1(X) + c_2h_2(X)] = c_1E[h_1(X)] + c_2E[h_2(X)]$
Where c_1 and c_2 are real constants.

OR

4. a) Consider a random variable, X, with the PMF as tabulated below [7M]

x	0	1	2	3
p(x)	1/8	1/8	1/4	1/2

Find

- (i) mean value of X
(ii) variance of X

- b) Let X be a continuous random variable with density $f_X(x)$, and a new random variable is formed by the transformation $Y = X^2$. Show that for $y \geq 0$, $F_Y(y) = F_X(\sqrt{y}) - F_X(-\sqrt{y})$ [7M]

5.a) State and prove the properties of joint density function [7M]

b) A joint sample space for two random variables X and Y has four elements (1,1), (2,2), (3,3) and (4,4). Probabilities of these elements are 0.1, 0.35, 0.05, and 0.5 respectively.

(i) Determine through logic and sketch the distribution function $F_{XY}(x,y)$

(ii) Find the probability of the event $\{x \leq 2.5, y \leq 6\}$

(ii) Find the probability of the event $\{x \leq 3\}$

OR

6.a) Define the bivariate Gaussian random variable. List all the properties of jointly Gaussian random variables. [7M]

b) The joint density of two random variables is given by

$$f_{XY}(x,y) = \begin{cases} \frac{1}{6}; & 0 < x < 2, 0 < y < 3 \\ 0 & \text{elsewhere} \end{cases}$$

Find the joint density of U and V, when $U = X - Y$ and $V = X + Y$

UNIT-IV

7.a) List all the properties of autocorrelation function. [7M]

b) What is ergodicity? Explain the concept of mean-ergodicity and autocorrelation-ergodicity with an example. [7M]

OR

8.a) Explain about Poisson random processes. [7M]

b) Derive the relation between correlation and covariance of two random variables X and Y. [7M]

UNIT-V

9.a) Find the mean and mean-square values of output $y(t)$ of an LTI system with input $x(t)$. Assume that $x(t)$ is a WSS process. [7M]

b) Find the power spectral density and average power of $X(t)$ with

$$R_{XX}(\tau) = \exp(-|\tau|)$$

[7M]

OR

10.a) Define the following systems with applications. [7M]

(i) Band-Limited process

(ii) Band-Limited Band pass process

b) Show that the autocorrelation function and power spectral density form Fourier transform pair.

[7M]

ISO 9001-2015 Certified, NAAC Accredited with B++, Promoted by Diocese of Guntur Society Guntur

DEPARTMENT OF ELECTRONICS AND COMMUNICATION ENGINEERING

IV B.Tech I Sem (R20) MID -2 EXAMINATION

Subject: OC

Time: 02:50 pm to 04:20 pm

Date : 05.12.2023

Section : ECE A&B

Answer the following questions

Max. Marks : 30

1. What is meant by 'fiber splicing'? Explain various types of fiber splicing techniques and fiber connectors.
2. a) Explain the working principle of edge emitting and surface emitting double hetero junction LED?
b) Explain the Physical principles of PIN and APD with neat diagrams?
3. Explain about link power budget and rise time budget in optical communication system.

IVB.Tech I Semester Regular Examinations, January 23–2024

OPTICAL COMMUNICATION
(Electronics and Communication Engineering)

Time: 3 hours

Max. Marks: 70

Answer any FIVE
Questions ONE Question from Each unit
All Questions Carry Equal Marks

UNIT-I

1a) Define Graded Index fiber (GIF). Explain the ray transmission mechanism in GIF. [7]

b) A multimode step index fiber with a core diameter of $100\mu\text{m}$ and relative index difference of 1.5% is operating at a wave length of $0.85\mu\text{m}$. If the core refractive index is 1.50, estimate (i) The normalized frequency for the fiber, (ii) The number of guided modes. [7]

(OR)

2 a) Draw the structure of an Optical fiber. Explain mode coupling effects due to bends in fiber.

(b) Silica OF has a core refractive index of 1.45 and a cladding refractive index of 1.42. D(i) Critical angle at the core-cladding interface (ii) Numerical Aperture of the fiber.

UNIT-II

3a) Discuss about the properties and applications of Active glass fibers. [7]

b) Define the term dispersion in fibers. Discuss about Material dispersion. [7]

(OR)

4a) Elucidate micro and macro bending losses. [7]

b) Explain about Information capacity determination. [7]

UNIT - III

5a) Discuss about single mode fiber joints. [7]

b) List out intrinsic coupling losses and explain any 2 losses with suitable diagrams. [7]

(OR)

6a) Explain about self alignment types existing during fusion splicing. [7]

b) What parameters to be considered while selecting good OF connector design? Explain.

UNIT - IV

7a) Design a surface emitting LED and explain their irradiation property. [7]

b) How the Temperature effects APD avalanche gain? Explain. [7]

(OR)

8a) How can be estimated resonant frequencies of a Laser diode? Explain. [7]

b) Classify detector response time and explain any one of the method. [7]

UNIT - V

9a) Write a note on Equilibrium Numerical Aperture and discuss the applications. [7]

b) What is WDM? Explain the basic principle of WDM? [7]

(OR)

10a) Explain how the power is coupling from source to fiber. Discuss an importance of acceptance angle during power coupling. [7]

b) List out the types of error sources and explain about any two sources. [7]
